

* Bug fixes *

Page No	
Date	

1. TaskRepository.java + db/oracle (Queries)

↳ Found :- Status "Done" + Search "Api"
showed mixed statuses and total 49

↳ Cause :- AND runs before OR,
so status checks covered only half

↳ Fix :- Put (title OR description) in brackets

2. TaskController.java

↳ found :- code reading, empty search waited about 1 sec.

↳ cause :- Thread.sleep, longer for shorter searches

↳ fix :- Removed it

3. TaskController.java

↳ found :- ? status = banana gave a 500 error

↳ Cause :- ValueOf throws on invalid enum value

↳ fix :- add try/catch returning 400 with a message

4. TaskController.java

- ↳ found :- ~~Try~~ Reading the code, tried page = 0 & huge pageSize
- ↳ cause :- Negative start index breaks sublist
No limit on size
- ↳ fix :- Page ≥ 1 , pageSize 1 to 100

5. App.jsx

- ↳ found :- Went to a later page, changed status, got an empty table
- ↳ cause :- Page state was never reset
- ↳ fix :- Handler also call setPage(1)

6. UseTasks.js

- ↳ found :- Reading the effect
Fast typing can show stale ~~st~~ results
- ↳ cause :- ~~slow~~ Slow old response arrives last, overwrites new one
- ↳ fix :- cancelled flag in the effect cleanup.
